

Labor Management House #7: Dedication Ceremony, May 20, 2009

V.P. and Chief Nuclear Engineer Waterfront Engineering and Testing Mr. Rolf

Bartschi:

"Will you do all you can to make your home a beacon of peace to all who pass by and to all who enter in."

Homeowner Ms. Mellakecha Thompson & Family:

"We will."

Habitat For Humanity Construction Supervisor Mr. Ron Nelson:

"This is a typical house. This is 1,230 square feet with a garage on it. Some places we don't use the garages depending on what the city will require us to use on some of the lots that we have. But most of the houses are between 1,200 and 1,300 hundred square feet with three bedrooms and two baths."

Construction Supervisor, X82, Mr. Brian Stockunas

"It's great. It's a big accomplishment to you know work for four months on Saturdays out here and to finally to finish it up and hand it over to the homeowner."

Homeowner Ms. Mellakecha Thompson:

"Probably so excited I can't even explain it. Just thankful that I'm able to own my own home and have my own place to give my kids to enjoy and grow up in for the rest of their years."
